

Direct Emulsion Coater

**Effortless, Consistent,
Smooth Coats EVERY time**

Adco's Direct Emulsion Coaters are precision engineered to ensure uniform coating thickness and consistent emulsion profiles from screen to screen.

Controlled by a CIMREX operator interface all settings are at the operators fingertips. The Coaters have programmable control and will store custom coating parameters for easy retrieval.

Features & Options

- Adjustable digital speed
- Smooth operation via toothed belt drive with AC Inverter
- Automatic positioning for screen holder
- Adjustable pneumatic clamps for screens
- Foot control offers easy operation by one person
- Length of coating area is adjustable
- Uniform coating pressure via air cylinders
- Slipping clutches and intrusion safety beams
- Dual screen available upon request

Model Sizes (Max. Frame OD)

From	43" x 47"	to	110" x 207"
	1050 x 1200mm	to	2800 x 5250mm

External Machine Dimensions

Width -	Screen width + 880mm
Height -	Screen height + 800mm
Depth -	700mm

Electrical

110 or 240 VAC

Air

85-90 p.s.i.
